

Employment and Supplier Opportunities

Consolidated Power Projects Australia Pty Ltd (CPP) has been selected as the Design and Construction subcontractor to design and construct the Energy Storage project. CPP will design and construct the 185MW|370MWh Battery Energy Storage Systems (BESS) and accompanying 220kV/33kV Substation as part of the facility as well as install the Tesla Megapack Batteries and Balance of Plant equipment for the project. The BESS will connect into the grid via a new 220kV Switchyard constructed by AusNet.

CPP accept Expressions of Interest (EOI) for a number of services required to assist with the delivery of the Koorangie Battery Energy Storage project, including:

- » Engineering/construction surveyors
- » Geotechnical services including testing and supervision
- » Bulk earthmoving subcontractors
- » Fill material
- » Quarried material including aggregate, sand and road base
- » Concrete suppliers and testers
- » Haulage/trucks
- » Plant hire including EWP's and telescopic handler
- » Cranage
- » Potable water and fuel supply
- » General cleaning
- » Waste facilities and services
- » Local employment agencies

We encourage participation from Indigenous suppliers and subcontractors.
